

In memoriam of Prof. Dieter Felsenberg

It is with deep regret and profound sadness that we announce the passing of Dieter Felsenberg, well known to all ISMNI and JMNI founding members.

Dieter Felsenberg studied medicine and was specialized in radiology. He had been an active member to many societies in the musculoskeletal field. He founded the Osteoporosis Research Group, the Centre of Muscle and Bone Research (ZMK), the German Academy for Osteological and Rheumatological Research (DAdorW), the Centre for Space Medicine, Berlin at the Free University in Berlin, and the German Society of Muscle and Bone Research (DGfMK). He was President of the International Society of Musculoskeletal and Neuronal Interactions (ISMNI) and Editorial board member of the Journal of Musculoskeletal and Neuronal Interactions (JMNI).

Dieter was an excellent colleague, a big thinker and devoted to research quality. He was a warm and generous special person with a delightful sense of humor, and a caring friend whom many people will long remember with respect. His research accomplishments on muscle field have been extraordinary.

We extend our deepest condolences to Dieter's family, to his many friends and colleagues throughout the world.

George P. Lyritis

JMNI Editor-in-Chief
Emeritus Professor of Orthopedics,
Faculty of Medicine,
National and Kapodistrian University of Athens, Greece
